### **Port of Oakland Protest**

[Oakland Police Department \(OPD\) is expecting 500-1000 demonstrators on Saturday, August 16, 2014 to protest the ships partly owned by the government of Israel. Although no law mutual aid has been requested, the Port has reached out to Alameda County Sheriffs Office \(ACSO\) for Law Enforcement support. The distinction is that this is a planned event and therefore not technically mutual aid. OPD is planning on having their Department Operations Center \(DOC\) open on Saturday. The protest is planned to occur, even if the ships cancel their arrival to the Port. Cal OES Law Enforcement Branch and the Cal OES Ports and Harbors representative continue to monitor the situation and coordinate information.](#)

# **SITUATION SUMMARY**

## **San Bernardino County Flooding, San Bernardino County (Update)**

### **Update:**

- San Bernardino County Operational Area activated at Level I Duty Officer status, for the purpose of monitoring, and situational awareness due to the anticipated return of monsoonal moisture to the region. These storms are predicted to bring a potential for lightning strikes, and flash flooding, which could adversely impact areas already affected impacted by the August Severe Weather Incident of last week.
- At 1728 hours, 08/11/14, San Bernardino County Operational Area deactivated.

Background: On 08/03/14, the Southern Duty Officer (SDO) was notified by the California State Warning Center (CSWC) that San Bernardino County Operational Area (SBOA) emergency operations center (EOC) had activated at a Level I in support of the significant flood events for the following areas in San Bernardino County; Forest Falls, Mount Baldy, Oak Glen and Lytle Creek. Flash floods Sunday brought thick debris flows that cut off access to towns. Numerous residents in the San Bernardino Mountains were unable to get out because the roads were covered with mud, rock and debris. Per the SDO there are no unmet emergency management and access and functional needs (AFN) nor any requests for State assistance.

### **Los Angeles County Proclamation, Summer Thunderstorms**

A Proclamation from Los Angeles County has been received proclaiming the existence of a local emergency due to the impact of summer thunderstorms. In addition, the Proclamation is requesting a Cal OES Director and Governor Concurrence, and that recovery assistance be made available from CDAA, SBA, and any other State or Federal Funds available.

### **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

# WEATHER

## Significant Weather

The National Weather Service (NWS) is forecasting increased thunderstorm potential for interior portions of northwest California, August 10th through Tuesday, August 12th; mainly afternoon and evening hours.

Red Flag Warnings and Fire Weather Watches have been issued for northern CA and much of OR through Tuesday.

## **Potential Event Highlights:**

- A low pressure system will form off the west coast on Saturday and settle to just off the northern CA coast by Sunday. The dynamics of this system along with residual moisture, daytime heating and a strengthening jet stream will result in perfect conditions for a significant and widespread thunderstorm outbreak event beginning Sunday and continuing through at least Tuesday, with nocturnal storms a good possibility.
- A significant number of dry lightning strikes are expected with these storms along with strong gusty outflow winds.
- Warm and very dry conditions currently exist and are forecast to continue throughout much of this region this weekend and into early next week.
- All of these ingredients add up to high potential for several large fire starts.
- Northwest CA and southwest OR look to be the focus of this event although the rest of northern CA and the rest of OR will likely see thunderstorms as well.
- The most critical time for lightning started fires is Sunday afternoon and evening (8/10) and again on Monday (8/11) and Tuesday (8/12) across OR.

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA:**

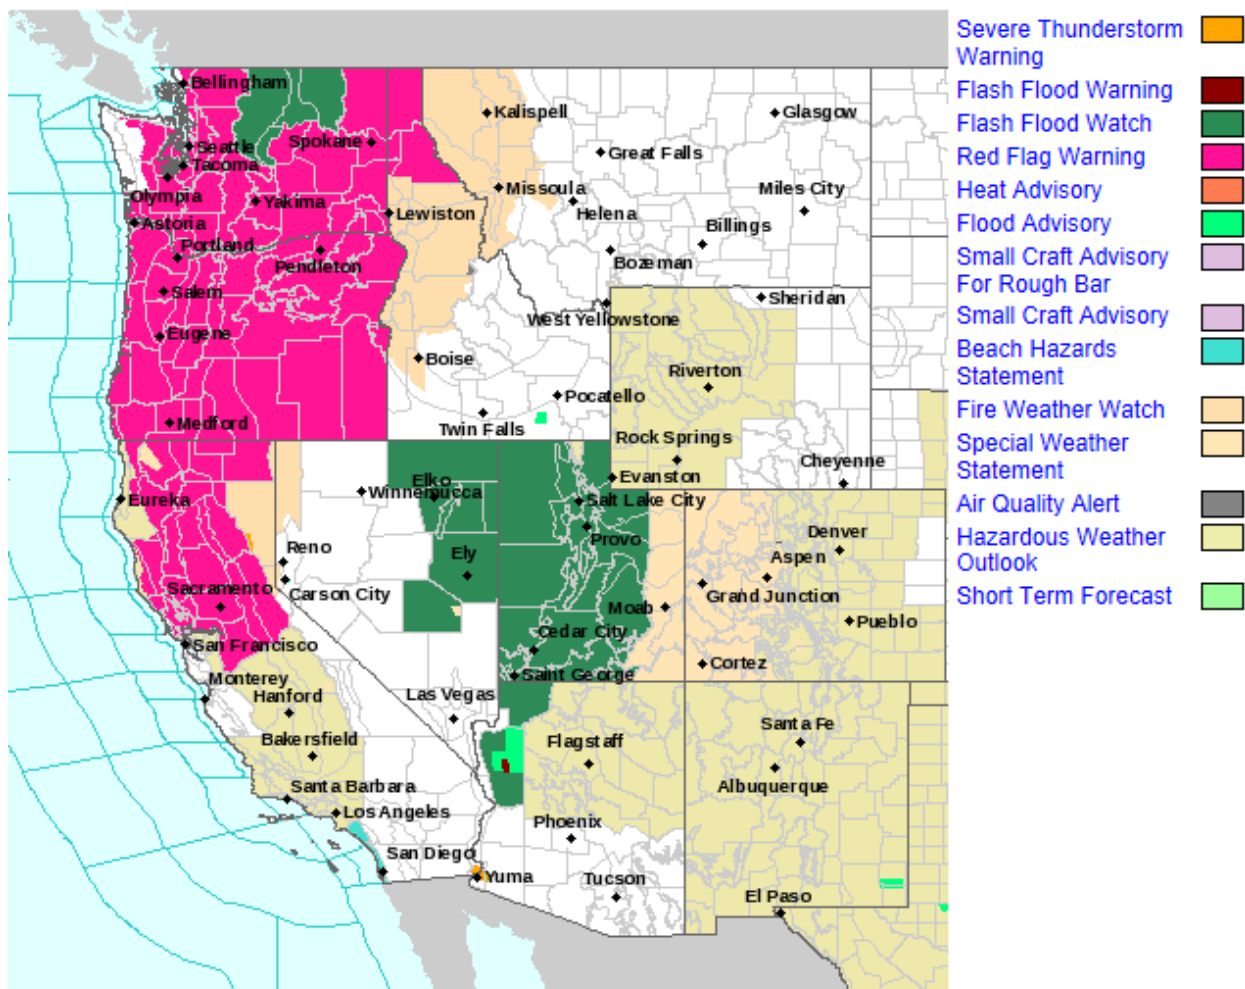

Nearly 900 lightning strikes occurred across northern California yesterday. These were a mix of wet and dry strikes, but even the wetter storms only had low end wetting rain amounts (0.10-0.25 inches). Most other strikes occurred with lighter or just trace amounts of rain. Another round of lightning expected again today into early Tuesday as low pressure remains nearly stationary off the San Francisco Coast, historically a classic lightning pattern for the region. There will also be some rain with these thunderstorms, but not very much, a trace to 0.15 inches in most areas with only a few isolated pockets in the Cascades or Warner Mountains getting a little more. Breezy and somewhat drier weather will quickly follow. A deep low over Oregon will bring increasing southwest winds of 15-30 mph late Tuesday and again Wednesday across many northern and eastern areas that were recently hit by lightning. A return to seasonably hot and dry weather expected by the end of the week into next weekend will continue the threat of both lightning holdovers and more growth on existing fires.

### **SOUTHERN CALIFORNIA:**

Moisture coming up from the south between low pressure off the San Francisco Coast and high pressure over the Four Corners Area will bring scattered showers and thunderstorms to the mountains and deserts through tonight. The low will move inland over Northern California Tuesday morning ending the thunderstorm threat across the Sierra, but southerly flow aloft will continue to bring scattered showers and thunderstorms to the mountains and deserts of Southern California east of the Cajon Pass through Tuesday afternoon. The thunderstorm threat will end across the region Tuesday night. Temperatures will continue to be a few degrees below normal through Thursday, with mid-70s to mid-80s in the mountains and upper 80s and 90s in the valleys. Minimum humidity will be mainly between 15% and 30% away from the coastal areas through Thursday. A ridge of high pressure will build northward out of Mexico bringing a warming and drying trend to the region Friday through this weekend.

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.

- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

### Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 10<sup>th</sup> : Don Pedro 43%; Exchequer 19%; Folsom Lake 40%; Lake Oroville 34%; Millerton Lake 50%; New Melones 25%; Pine Flat 12%; San Luis 20%; Lake Shasta 33%; Trinity Lake 33%; Pyramid Lake 93%; and Castaic Lake 47%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)  
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water<sup>1</sup> to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

## Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
